| | Subtotal | \$0.00 |
| | TOTAL | \$4,338.85 |

Overview of Travel and Objectives

Premier Brad Wall travelled to Phoenix, Arizona to attend the WGA 2017 Winter Meeting.

- Thirteen Governors representing Alaska, American Samoa, Arizona, California, Colorado, Guam, Hawaii, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Northern Mariana Islands, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington and Wyoming participated in the Winter Meeting. The event provided an excellent opportunity to establish new, and strengthen existing, relationships and discuss shared trade and energy priorities with the attending Governors, officials representing the U.S. Administration and state governments, and industry.

At these meetings Premier Wall:

- delivered timely, strong messaging to influential U.S. Governors on Canada's and Saskatchewan's concerns regarding the North America Free Trade Agreement (NAFTA) negotiations and reinforcing the importance of free trade for both nations:
 - obtain the Governors' perspective on the current state of NAFTA negotiations and explore whether any action can be taken at the sub-national level to ensure the negotiations continue to progress in a constructive manner;
 - emphasize the benefits of maintaining open trade with Canada;
 - reinforce that the uncertainty around NAFTA has the potential to negatively impact jobs and investment in the U.S. (and Canada); and,
 - stress that it is critical for our economies and supply chains to remain integrated to maintain North American competitiveness in other markets.
- signed a MOU on CCUS collaboration and knowledge sharing with the Governors of Montana, North Dakota and Wyoming.
- held a joint meeting with Montana Governor Steve Bullock, North Dakota Governor Doug Burgum and Wyoming Governor Matt Mead to sign a MOU on CCUS and encourage Governors to reach out to their contacts in the U.S. Congress and Administration to advocate for a successful renegotiation of NAFTA.
- participated in a Roundtable Session with Western Governors and representatives from the Federal Emergency Management Agency, National Association of State Energy Officials and the Salt River Project (one of the largest power utilities in the U.S.) to discuss how jurisdictions can prepare for the impact of natural disasters on water and energy infrastructure. The Premier shared SK's tactics for emergency preparation, including the province's approach to adaptation and resiliency.
