	TOTAL	\$1,649.76

Overview of Travel and Objectives

The Western Ministers responsible for transportation shared with WESTAC members their respective visions for transportation and shared their provincial priorities. Positive and collaborative relationships with all levels of government, shippers and carriers, both within Saskatchewan and outside our borders, are critical. Saskatchewan's prosperity is linked to trade and exports. To ensure this, Saskatchewan is focused on three strategic priorities:

1. Supporting trade with infrastructure investments;
2. Enhancing economic corridors and gateways to improve the movement of goods;
and
3. Efficient management of the transportation network.

Saskatchewan's objectives for the meeting:

- Build relationships with business and western provinces, and advance Saskatchewan's position in support of the Western Transportation Trade Corridor.
- Work collaboratively with stakeholders and the federal government to improve market access to international markets.
- Encourage WESTAC to forge common principles and priorities in the western region.
- Profile Saskatchewan's support of the five fundamental themes in the Transportation 2030 framework, as well as continued investments by the federal government and private sector in the Pacific Gateway Trade Corridor.
- Focus the discussion on the need for strategic infrastructure investments in western Canada to facilitate reliable and efficient trade relative to the trade and transportation corridor initiative.
