<b>TOTAL</b>	<b>\$3,634.87</b>

## Travel Activity Report Form

### Overview of Travel and Objectives

---

Recognizing the important contribution of transportation to economic growth and quality of life, Federal, Provincial and Territorial Ministers of Transportation and Highway Safety met to discuss the future of transportation in Canada and to reaffirm their commitment to working together.

The Ministers agreed on a number of shared priorities to help:

- Enhance safety;
- Support internal and international trade corridors;
- Improve the traveler experience;
- Address climate change;
- Foster innovation; and
- Share information.

Safety remains a priority for all Ministers as they are committed to pursuing a dialogue on road, rail and marine safety. The Ministers also agreed to work together to address climate change, including mitigation and infrastructure adaptation, and provide leadership towards the reduction of greenhouse gas emissions from the transportation sector.

Also discussed was the commitment to improve the efficiency of trade and transportation corridors, including addressing infrastructure requirements and reducing internal barriers to trade. The Minister agreed in principle on amendments to the Memorandum of Understanding Respecting a Federal-Provincial-Territorial Agreement on Vehicle Weights and Dimensions. The Ministers discussed further harmonization measures for trucks such as electronic logging devices and investing in efficient and seamless trade corridors in order to bring goods to market.
