Message from the Provincial Secretary and Minister responsible for Francophone Affairs

It is my pleasure to present this report on the Government of Saskatchewan's French-language Services Policy which highlights the achievements of the ministries, Crown corporations and government agencies over the last two fiscal years (2007-08 and 2008-09).

During this period, Saskatchewan has renewed its dialogue with representatives of the Fransaskois community, most notably through the creation of the Advisory Committee on Francophone Affairs that will report directly to my office. I am confident that this more formal consultation mechanism will bolster the province's efforts in implementing its French-language Services Policy.

We have also strengthened the mandate of the Francophone Affairs Branch (FAB), making it a central agency with respect to French-language services. This expanded mandate, combined with the repositioning of our translation services, will allow our ministry to play an even greater role in ensuring the creation and delivery of additional French-language services. In fact, in the 2009-10 Provincial Budget, the Government of Saskatchewan announced plans to create and implement a virtual French-language Services Centre in the coming year.

As Minister responsible for Francophone Affairs, I would like to thank all partners and stakeholders who have contributed to the success of the achievements presented in this report. By supporting the development and vitality of the Francophone community, we are taking advantage of the assets at hand to ensure the community's growth to the benefit of all residents of Saskatchewan.

June Draude
Provincial Secretary

achievements

Highlights

new initiatives

Advisory Committee on Francophone Affairs

The Provincial Secretary and Minister responsible for Francophone Affairs appointed eight members to the new Advisory Committee on Francophone Affairs in January 2009.

The Committee will work with representatives from different Francophone communities and provincial ministries, to provide advice to the government and assist with the implementation of Saskatchewan's French-language Services Policy.

The Committee replaces the Francophone Community French-Language Services Liaison Committee (or Joint Liaison Committee) which was created in 1999 as part of the Canada-Saskatchewan Agreement on French-language services. The committee has a three year mandate.

Saskatchewan French-language Services Centre

In March 2009, the Government of Saskatchewan announced the creation of a French-language Services Centre for its citizens. The Centre will serve as a single window for the public to access services and programs of the Government of Saskatchewan in French.

The Centre will give priority to the delivery of online services and telephone services to ensure the same level of coverage for all Francophone communities in the province. Where necessary, the Centre will also establish outreach services in certain communities, in partnership with the Government of Canada and with the Fransaskois network of associations.

The Francophone Affairs Branch plans to launch this initiative in the fall of 2009.

“Bonjour!” Active Offer of Services Campaign

The Francophone Affairs Branch has developed a communications strategy in order to better inform citizens of provincial government services available in French.

This active offer campaign, represented by the “Bonjour!” symbol, is designed to facilitate identification of services offered to the public in French. To do this, a toolbox consisting of posters, pins and practical suggestions will help Government of Saskatchewan employees with the delivery of services to its citizens.

Implementation of this campaign is in its beginning phase, and will extend to all ministries who offer services in French to the public. The French Services Centre will support implementation of this campaign by identifying new resources.

active offer

Francophonie

Intergovernmental Cooperation

Saskatchewan has worked in close partnership with the Government of Canada in implementing its French-language Services Policy over the last two years through the Canada-Saskatchewan Agreement on French-language Services (2005-09).

Saskatchewan has continued to be active within the Ministerial Conference on the Canadian Francophonie (MCCF) and has played a leadership role in the youth sector over the last two years.

A national youth strategy has been adopted by members of the Conference and an action plan, including youth dialogues in the majority of provinces and territories, has allowed participants to discuss and develop the notion of active citizenship. In cooperation with the *Fédération jeunesse canadienne-française*, a national youth forum was held in February 2009 to help the participants develop the framework for a presentation to ministers for Ministerial Conference in 2009.

The Francophone Affairs Branch has also hosted and supported the National Coordination Office of the Conference in its offices over the last two years.

International Francophonie

The Francophone Affairs Branch is now mandated to play an international role with respect to Francophone countries that share strategic interests with Saskatchewan.

Specifically, two Saskatchewan ministers took part in the *Sommet de la francophonie* held in October 2008 in Quebec City. This event allowed Saskatchewan to strengthen its visibility and links with the Canadian and international Francophonie through a series of targeted meetings focusing on the international mobility of manpower, collaboration in terms of research and technologies, and the development of certain markets for goods produced within the province.

In 2008, The Francophone Affairs Branch also participated in an exploratory mission to France along with representatives of the Fransaskois community and the *Institut français* of the University of Regina. The purpose of this visit was to identify a number of possibilities for partnerships between France and Saskatchewan.

translation

Translation Service

Over the last few years, the branch has experienced considerable growth in its volume of translation, further indicating the need for the offer of French-language services in Saskatchewan.

Translation Volume (2004-09)

During 2007-08 fiscal year, 620,820 words were received and processed, a record amount. However, this situation could not be sustained because of limited resources. During the branch's last financial exercise a more restricted translation policy was developed and has resulted in a smaller volume of translation, allowing the branch to reposition its translation service and direct more of its services towards public documents intended for citizens at large.

In the 2009-10 Provincial Budget the branch received an increase which will allow it to increase its volume of translation considerably, to support the new French-language Services Centre.
