

Industry Tip

'Well Document Search' Function on December 6, 2017:

Date	Module/Application/Functionality	Notes
November 20, 2017	Well and Facility Infrastructure: Attachment Search tool.	Initial Release

'Well Document Search' tool will be implemented on December 6, 2017.

Since the decommissioning of the Ministry's online Digital Well Log Database (DWD) search tool in December 2015, industry has been limited to search/view Well attachments at an individual well level search and downloads with IRIS. It has been recognized, that there is a need to enhance the Well Document Search to allow a broader number of wells and document types to be searched within a single search function

The Well Document Search tool will allow users to perform either a Basic or an Advanced search with the added feature of searching by a larger land location range.

The 'Basic Search' gives the user the ability to search by a limited number of categories, either "Logs" or "Non- logs". However, the 'Advanced Search' gives the same by a larger land location search ability with increased capabilities to select by specific sub-categories of the attachment types (i.e. Well log LAS files, Non-Log Core Analysis, DST's or a combination thereof).

The results from either search option will give the user the ability to download and save the files, but is limited to a single extraction at a time.

In addition, the same existing IRIS confidentiality rules will be applied to the user. Therefore, only users who have the existing permissions to view confidential well attachments can view confidential well attachments. All other non-confidential well files can be viewed by all.

Questions?

If you have any questions or concerns about:

- The non-compliance penalty assessment program, contact PNG Support at 1-855-219-9373 or PNG.support@gov.sk.ca.
- Invoice summaries or details, contact ER Support at 1-844-213-1030 or er.support@gov.sk.ca.
