

# Strategic Business Overview and Procurement Forum

## October 10, 2018

World Trade Centre, Prairieland Park  
Saskatoon, SK

## Learn about Saskatchewan infrastructure plans and how to do business with government.

Saskatchewan is investing in infrastructure for a growing province. Saskatchewan's 2018-19 Budget includes \$2.7 billion for investment in infrastructure projects, ranging from expanding power generation assets to telecommunications networks, water systems, schools and highways.

The forum will provide an opportunity to learn more about the major infrastructure plans around information technology, construction, engineering and manufacturing services of Saskatchewan Crown corporations and ministries. There will also be a chance to network and to learn "how to do business" with the Crowns and ministries.

Current confirmed participants include the City of Saskatoon, SaskGaming, SLGA, Saskatchewan Research Council, SaskTel, SaskWater, SaskPower, Saskatchewan Ministry of Highways and Priority Saskatchewan.
