Release Notes

IRIS Version 5.17

Release Date: December 6, 2018

Release Notes Publication Date	Notes and Changes Made
December 6, 2018	Initial Release

About

This release implemented 41 items including functionality for Pad Well Sets (new Active or Inactive status), and "Well" and "Facility" Licence Applications for First Time Orphan Fee and LLR (Licensee Liability Rating). A new "Waste Disposal (Cavern)" completion type was added to the Well Licence and Reclassification Applications, and a Quick Link added to Inspections and Incidents from the Well Licence page. Multiple enhancements and fixes to known defects have been implemented to the Billing and Reporting, Data Integration, Petroleum Tenure, and Well and Infrastructure modules.
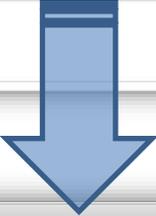

What's changed?

The highlights of what's changed in IRIS as a result of this release are noted below.

Note: Whether a user has access to the functionality or enhancements outlined in these *Release Notes* depends on the individual's security access and assigned permissions sets.

Well and Facility Infrastructure Functionality

- Functionality for "Well" and "Facility" Licence Applications for First Time Orphan Fee and LLR (Licensee Liability Rating) Excluded flag. IRIS will check if companies have paid the Orphan Fee or are on the LLR excluded list. If neither are true, IRIS will prevent the company from submitting a well or facility licence application.

- Pad Well Sets now have a status (Active or Inactive). Industry cannot add an "inactive" pad well set number to a well licence application. IRIS will generate a warning and industry will need to search for the correct number. A status column has been added in "Well Set" search.

- Users will now be able to see the last event completed on an inspection item when viewing inspection item history. This will aid the user in determining details regarding the last event of an inspection item, for example the closed – acceptable fix event will be shown with the date the re-inspection was completed by Ministry.

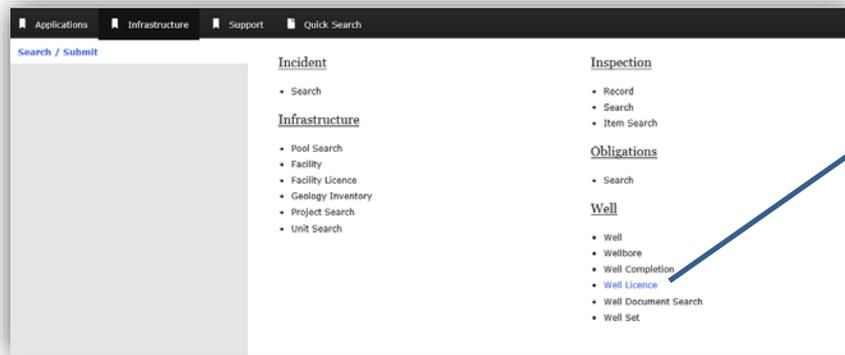

The "see history" function for an inspection item will now indicate the details of the last created event.

Inspection Item History - #25266

Event DateTime	Action Required Comment	Inspection Item Status	Re-inspection Completed Date	Closure Comment	Due Date	Industry Corrected Date	Industry Correction Comment	Ministry Comment	Closure Comment
2018-11-06 09:21:29	Remove weeds from lease	Industry Action Required	N/A		2018-11-10	N/A		Weeds on lease	
2018-11-06 09:22:58	Remove weeds from lease	Ready for Reinspection	N/A		2018-11-10	2018-11-03	weeds have been removed	Weeds on lease	
2018-11-06 09:24:12	remove seeds still present on lease	Industry Action Required	2018-11-04		2018-11-15	N/A		weeds still present on lease	
2018-11-06 09:24:53	remove seeds still present on lease	Ready for Reinspection	2018-11-04		2018-11-15	2018-11-05	Removed weeds second time	weeds still present on lease	
2018-11-06 09:25:43	remove seeds still present on lease	Closed - Acceptable Fix	2018-11-06	weeds have been removed in a satisfactory manner.	2018-11-15	2018-11-05	Removed weeds second time	weeds still present on lease	weeds have been removed in a satisfactory manner.

Last line in the Inspection Item History now shows the detailed information regarding the last event.

- Well Licence and Reclassification applications will have "Waste Disposal (Cavern)" as a new well completion type that industry can select.

- Wellbores and Well Completions whose associated authorization have expired, and have not been reported to, will now be removed from the well's list of wellbores and well completions. For details see the Industry TIP.

- New Functionality to see Quick Link to Inspections and Incidents from Well Licence page. For details see the Industry TIP.

Infrastructure, well licence #, search, choose actions from search results view.
