Release Date: February 2, 2017

<i>Release Notes Publication Date</i>	<i>Notes and Changes Made</i>
February 2, 2017	Initial release

About

This release implemented 119 items, including functionality that enables industry users to subscribe to IRIS notifications.

The highlights of what's changed for each module are noted below.

Note: Whether a user has access to any of the functionality or enhancements outlined in these *Release Notes* depends on the individual's security access and assigned permission sets.

Notifications Enhancements

Industry users can now subscribe to the notifications they wish to receive from the Ministry of the Economy (ECON) through IRIS. Users can also manage how they receive notifications including by email and online.

Notifications are a communications tool used by ECON to inform industry users:

- of ECON's decisions on applications;
- of required actions and due dates;
- when invoices are available in the system;
- when ECON has completed tasks or activities;
- of changes to the status of authorizations;
- of changes to the status of well completions;
- of requests for information for incidents and inspections.

IRIS users can subscribe to the following notification types:

Module	Notification Type
Petroleum Tenure	<ul style="list-style-type: none"> • Disposition Transfer Application Approved or Denied • Posting Request Application Approved or Denied • Offset First Year Notice (Lessee) • Builder's Lien Registered (Lessee) • Disposition Surrender Application Approved or Denied • Lease Selection Application Approved or Denied • Petroleum Tenure Application Approved or Denied • Offset First Year Notice (Payor)

For more information on getting started and managing notifications, see the following [IRIS Industry Tip](#).

Oil and Gas Tenure Functionality

- Lessees or a Confidential Designated Representative on a disposition have the ability to view the following information available on the 'Obligation Tab' of the 'Disposition Maintenance' screen for Special Exploratory Permits (SPE) and permits:
 - annual expenditure amount per hectare per year;
 - expenditure deposit amount per hectare per year;
 - work commitment expenses against the disposition for a reporting period; and
 - calculation performed if there has been a surrender or lease selection against the disposition.

Well and Facility Infrastructure Functionality

- Navigation issues with the 'Go Back' button when using search functionality are resolved. Users are now able to navigate back to previous search screens with the parameters intact after navigating away to view or edit items selected from the search results.
- A new on-demand report is now available that enables industry to monitor their infrastructure wellbore completions so they can adjust production as required to meet their Allowable Rates of Production (ARP). The Excel report can be found under Infrastructure tab under 'Reports' on IRIS's main menu.

- Industry is able to view associated entities linked to an authorization.
- Surface casing/gas migration reports can be attached to a well at any time, and not just at the time of abandonment.
- Rather than responding to a disclosure question (DQ52), the following condition is now required for all well licences:
“Any existing wells within 25m of the drilling location must be suspended and mechanically isolated by means satisfactory to the field office during drilling operations.”
- IRIS now warns well licence applicants when an entered target pool or drainage unit looks incorrect.
