About

This release implemented 93 items, including new unit application functionality.

What's changed?

The highlights of what's changed for each IRIS module are noted below.

Note: Whether a user has access to any of the functionality or enhancements outlined in these *Release Notes* depends on the individual's security access and assigned permission sets.

Well and Facility Infrastructure Functionality

- New unit and unit amendment application functionality was added to IRIS. In addition, negotiations between the Ministry of the Economy (ECON) and the industry applicant now take place through IRIS using 'Work Items' functionality. For more information, see the following [IRIS Industry Tip](#).
- Additional fields were added to the reclassification and recompletion applications. These new fields will assist ECON in addressing these industry applications more quickly. The new fields are highlighted below (the fields are the same for reclassification and recompletion applications).
