## Instruction Letter

### Electronic Flow Measurement for Gas and Liquid Systems

Pursuant to sections 81, 82, 84, 85 and 86 of *The Oil and Gas Conservation Regulations, 2012*, the Ministry of the Economy (ECON) approves the use an Electronic Flow Measurement (EFM) system at all upstream facilities and wells licensed in Saskatchewan, for the purpose of metering oil, gas or liquid production, provided that the requirements specific to installation, operation, maintenance and measurement of EFM systems of Alberta Energy Regulator AER's *Directive 017: Measurement Requirements for Oil and Gas Operations (May 2013)*, are met. All EFM installations will be subject to the following additional requirements:

- Installed, operated and maintained to manufacture specifications;
- Information pertaining to the location, model number, date installed, calibration and maintenance records, etc shall be available at the site or made available within 24 hours on request by ECON
