

# Release Notes

---

## IRIS Version 5.11

Release Date: December 06, 2017

<i>Release Notes</i> Publication Date	Notes and Changes Made
December 06, 2017	Initial Release

## About

This release implemented 54 items, including the enhancement of the existing DHOA Application and Non-Productivity Review Application as well as the implementation of a new 'Well Document Search' function.

## What's changed?

The highlights of what's changed in IRIS as a result of this release are noted below.

**Note:** Access to the functionality or enhancements outlined in these *Release Notes* depends on the individual's security access and assigned permissions sets.

### Well and Facility Infrastructure Functionality

- IRIS users can now use the Well Document Search tool to perform either a Basic or an Advanced search with the added feature of searching by a larger land location range. See the IRIS Industry Tip [Well Document Search tool](#) published on [www.saskatchewan.ca/IRIS](http://www.saskatchewan.ca/IRIS) on November 20, 2017 for more information.
- IRIS can now capture the Reinspection Date in the Inspection Item History. Industry users can check the Inspection Report for the latest Reinspection Date information.
- Fixed an issue where IRIS generates a reminder notification on the same day as the inspection is entered regardless of the due date of the inspection item.

- Fixed an issue where the Reference ID field is showing incorrect “Inspection Item ##” on the reminder of the resolution details due for Inspection non-compliance.

### Petroleum Tenure Module

- The Application for Designated Heavy Oil Area (DHOA) has been enhanced to include the ability for an applicant to:
  - identify the Stratigraphic Unit of the requested DHOA
  - specifically choose one of four DHOA application type (Pre-DHOA Year 1, Pre-DHOA Year 2, DHOA Term 1 and DHOA Term 2)
  - communicate the reason for the application
  - add the disposition(s) and select specific lands within the disposition
  - attach supporting documents
  - applications may only be submitted between September 1<sup>st</sup> and February 28 (29 on a leap year)
- The Application for Non-Productivity Review has been enhanced to include the ability for an applicant to specifically identify the details of the non-productivity request:
  - disposition ID
  - well completion (only one well completion is required)
  - pool
  - submission of Non-Productivity applications between March 1st and June 30th is not recommended and may be delayed for review due to Lease Continuance.

Industry is directed to submit any Designated Heavy Oil Area and Non-productivity Review applications that may be saved as draft to recreate them using the enhanced applications as the previous application formats may no longer be able to be submitted after December 6, 2017.

### Security and Permission Sets

The following changes was made to IRIS’s permission sets.

Petroleum Tenure Module
