Facility Name and Number: Athabasca Health Facility

Date of visit (DD/MM/YYYY): Sept 30, 2017

Please list those from the RHA that attended:

Tiffany Adam Clinical Coordinator

Please describe what is working well as identified through your visit and discussions with residents and families:

Purposeful hourly interaction are no longer being tracked daily as we have maintained above 80% and resident surveys reflect a satisfactory report.

Please describe areas for improvement as identified through your visit and discussions with residents and families:

1. Surveys completed with both residents and families supports the need for more activities provided with the residents. Client engagement has been a challenge we currently individuals that can participate in activities and getting them engaged has been difficult.

2. Since the implementation of the new Dietary menu, staff compliance to follow menu does remains low. This is concerning as this often does not follow food guide or medically warranted diets.

... 2

Please describe how the information gathered in this visit will be incorporated into your overall efforts to improve quality of care for residents and staff in long-term care:

Given we have a low number of residents we will work at providing one to one activities to help improve the residents quality of life. Clients will have assessments completed by the Psychiatric nurse and involve her in the planning of activities with the Activity coordinator.

Recommend continued meetings with kitchen staff; encourage further educational opportunities geared towards the effects of diet to overall health.
