**New influenza cases identified for the WEEK OF FEBRUARY 04 - 10, 2018**

**134** lab-confirmed influenza cases<sup>1</sup>.

Total lab-confirmed cases since September 01, 2017

**2227**

**Severe cases admitted to hospital**

WEEK OF FEB. 10, 2018	TOTAL SINCE SEPTEMBER 01, 2017
NO ICU ADMISSIONS	34 ICU ADMISSIONS
NO DEATHS	11 DEATHS due to influenza

**Outbreaks in long term care facilities**

WEEK OF FEBRUARY 10, 2018	TOTAL SINCE SEPT. 01, 2017
3	61

<sup>1</sup>Numbers are an underestimate. Not all people seek medical care and are tested for influenza, and not all those who died with influenza-like illness were tested.  
<sup>2</sup>The number of cases for current and recent weeks will increase as lab specimens are received and processed by laboratories.
